

Treating for ticks and fleas does not protect my dog from heartworm infection.

Grounded or **Unfounded?**

FACT: Using products that prevent ticks and fleas on your dog does not automatically prevent infection with heartworms, but several products on the market are formulated to prevent all three parasites. Discuss the best preventive choice

with your veterinarian to ensure that you are providing optimum flea, tick, and heartworm protection for your dog.

BEST STRATEGY: Consult your veterinarian about the right product choices, and be sure to give them as directed.

Protection is priceless.
Choose year-round heartworm prevention for your pet.
