

SAY **YES** TO HEARTWORM TESTING

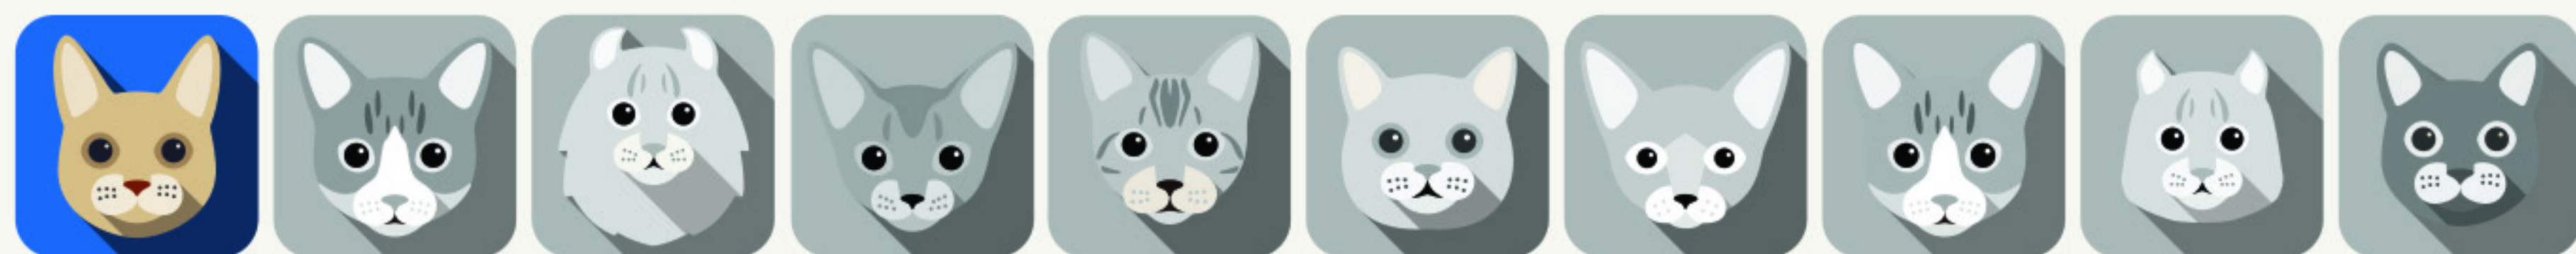

AMERICAN
HEARTWORM
SOCIETY™
EST. 1974

WHY? UNPROTECTED PETS ARE AT RISK!

Only 4 in 10 dogs are on heartworm preventives

Only 1 in 10 cats is on heartworm preventives

WHY? EVEN PROTECTED PETS COULD BE AT RISK!

Your pet might have spit out or rubbed off a dose

You might have missed a dose by mistake

WHY? PETS DON'T TEST POSITIVE FOR MONTHS AFTER INFECTION

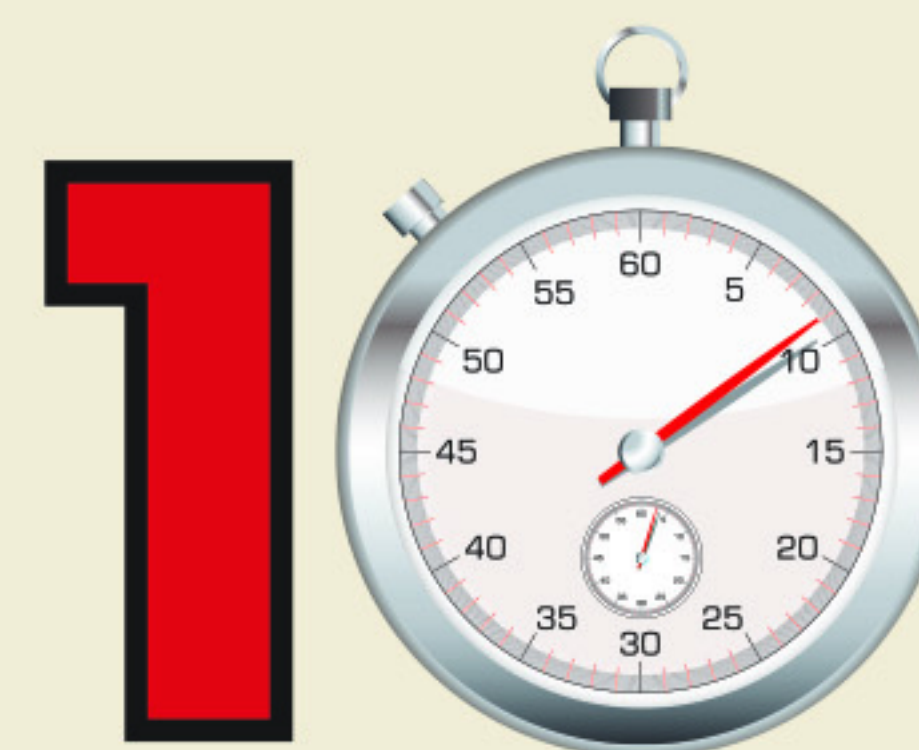

On average, 6 months for dogs and 8 months for cats

WHY NOT?

IT'S EASY & QUICK!

3 DROPS is all the blood it takes to run a heartworm test

1 MINUTES OR LESS

is all the time it takes to run a heartworm test in your veterinarian's office

PROTECT YOUR PET **12** MONTHS A YEAR. TEST FOR HEARTWORMS EVERY **12** MONTHS.
